ABSTRACT

For a number of years, analyses have been conducted each fall term to determine changes in the draw of high school graduates to Florida's Miami-Dade Community College (MDCC) from the Dade County Public Schools. Findings of the 1997 study, including comparisons with data from studies conducted over the past 5 years, include the following: (1) in 1995-96, there were 13,266 standard-diploma graduates from 25 Dade County public high schools, 39% of whom enrolled at MDCC during 1996-97; (2) for 1996-97, nearly 27% of the White non-Hispanic, 31% of the Black non-Hispanic, and 49% of the Hispanic Dade County high school graduates were drawn to MDCC; (3) during the past 5 years, MDCC's draw of Dade County high school graduates decreased by 934 students, putting it at a five-year low; (4) of the 25 feeder schools, 10 increased in numbers drawn to the college; (5) schools with the largest positive change in draw for 1996-97 were Killian (+45), Sunset (+31), Carol City (+20), Southwest (+17), and Hialeah-Miami Lakes (+16). College-wide comparisons and campus data for specific high schools are provided. (EMH)

High School Draw:

Direct Entry Enrollment of
Dade County Public High School Graduates
Annual Report Year Data 1992-93 Through 1996-97

The High School Draw report monitors the draw of standard diploma Dade County public high school graduates to Miami-Dade Community College. The report includes five years of data and looks for enrollment at Miami-Dade for four terms beginning with the Spring and ending in the Winter. College-wide comparisons and campus data for specific high schools are provided.

COLLEGE-WIDE SUMMARY

Table 1 presents the number of high school graduates for 1992-93 through 1995-96 and the draw to Miami-Dade for each year following graduation.

- For the latest year, 1995-96, there were 13,266 standard diploma graduates from 25 Dade County public high schools. Of these graduates, 39.9% or 5,295 were enrolled at Miami-Dade during 1996-97.
- The draw within ethnic subcategories for 1996-97 shows nearly 27% of the *White non-Hispanic* high school graduates drawn to M-DCC, 31% of *Black non-Hispanics*, and 49% of the *Hispanics*.
- Looking across five years, while the number of Dade County public high school graduates decreased by 2.1%, the College's draw of these graduates decreased an appreciable 15% (934 fewer students). Note that Miami-Dade is at a five year low in both absolute number and percent of graduates drawn.
- The steep decline is also seen within each ethnic group. The number of *White non-Hispanic* high school graduates declined 27% since 1992-93 and Miami-Dade's draw decreased, correspondingly, by 31%.
- The number of *Black non-Hispanic* high school graduates decreased by less than 1% but the College's draw decreased more than 12%.
- While the number of *Hispanic* high school graduates increased 7.6%, our draw decreased 12.4%. Miami-Dade drew fewer than 50% of Hispanic high school graduates this past year.

Table 2 gives a summary of the high school draw results from individual schools for the past two years. Schools are sorted in descending order by the size of the 1996-97 draw to the College.

- Of the 25 high schools, ten schools increased in numbers drawn to the College. These increases ranged from 1 to 45 students.
- Schools with the largest positive change in draw for 1996-97 were *Killian* (+45), *Sunset* (+31), *Carol City* (+20), *Southwest* (+17), and *Hialeah-Miami Lakes* (+16).
- However, these positive changes could not be offset by the severe drop in draw for a number of high schools which finally resulted in a college-wide decrease of 273 students. Schools which most radically impacted the draw negatively were *Edison* (-73), *Braddock* (-60), *Coral Park* (-44), and *Jackson* (-38). Additionally, there was a cluster of seven schools with declines between 26 and 31 students.
- Another indicator of draw difficulties is exemplified by *Braddock*. Although the draw from *Braddock* to M-DCC was large (425), this was 60 fewer students than last year.

NORTH CAMPUS

Tables 3 and 4 are devoted to **North Campus** recruiting schools. Table 3 presents summary results.

- There were 4,632 graduates in 1995-96 of which 1,609 or 35% were drawn to M-DCC in 1996-97.
- By ethnic group, 19% of *White non-Hispanic* graduates, 30% of *Black non-Hispanics*, and 45% of *Hispanic* graduates were drawn to M-DCC.
- Over the five year period, there was a 6% decline in graduates and a 17% decline in draw of graduates (-330).
- Decreases since 1992-93 occurred for all ethnic groups. The number of *White non-Hispanic* high school graduates plummeted 36% and the draw showed a 44% drop. The number of *Black non-Hispanic* graduates decreased by 5% but the draw declined 19%. Though the number of *Hispanic* high school graduates grew by 3.4%, the draw to North Campus dropped by 11%.

Table 4 shows the draw from the nine individual high schools for the North Campus recruiting area. These schools are sorted high to low by the percent of graduates drawn in 1996-97. The percent draw for each school is calculated from the ratio of draw to graduates. Graduates drawn from one recruiting area may be attending a campus outside of the recruiting campus area. This detail is classified under "enrolled other" in the table.

- Compared to the previous year, Miami-Dade in 1996-97 drew fewer graduates from six of the nine North Campus recruiting schools.
- The percent draw from *Hialeah* of 50.6% was, by far, the highest. *Hialeah-Miami Lakes* and North Miami were next highest at 42.6% and 41% respectively.
- The lowest draw schools for North were *North Miami Beach* (20.7%) and *Northwestern* (21.6%). Both of these schools are at their five year low in proportional draw.
- Almost without exception, we drew a lower percentage of graduates from each school compared to 1992-93.

Figure 1 illustrates the statistics presented in Table 4 of the draw to Miami-Dade (top light shaded) of graduates in the North Campus recruiting area. Though *American High School* graduated the most students (720), a little over one third were drawn to the College. The proportion of graduates with an unknown status is the bottom darker shaded area. These unknown status graduates may have moved from the Miami-Dade area, attended another postsecondary institution, may be working, and/or not continuing their education at the time of data capture:

KENDALL CAMPUS

Tables 5 and 6 deal with the **Kendall Campus** recruiting school. Table 5 displays the **Kendall** draw with comparisons within each ethnic group.

- There were 4,963 high school graduates and 2,238 or 45% of them were drawn to Miami-Dade in 1996-97.

- For the latest year, 28% of *White non-Hispanic* graduates were drawn to Kendall Campus, 35% of *Black non-Hispanics*, and 55% of *Hispanic* graduates

- The comparison across five years shows a slight increase in number of graduates (13) but a 13% decline in draw (-339 graduates). The decrease in graduates was dramatic for the *White non-Hispanics* (-25%), as was the decrease in those enrolling at M-DCC (-34%). There was a 14% increase in *Black non-Hispanic* graduates and a 4% increase in draw. For *Hispanics*, high school graduates increased by 13% but the draw to the College fell nearly 10%.

Table 6 details the draw from each of the eight high schools in the Kendall recruiting area. Schools are arranged by the percent draw from largest to smallest. Graduates in this campus recruiting area who are attending another M-DCC campus are classified under "enrolled other." Percents drawn were formed using the formula of total enrolled over the base number graduated.

- The percent draw was highest at *Sunset*, 56% or 370 graduates, but the highest absolute number of graduates drawn to the College was 425 from *Braddock* (48% of the graduating class). *Southwest* was second highest in draw at 53%.

- Palmetto had only a 27% draw, the lowest among Kendall schools. This last position for Palmetto has remained fairly constant across the years. There was nearly a 13 percentage point difference between *Southridge*, the second lowest, and *Palmetto*.

- Across the five year span, Kendall had a seven percentage point drop in draw although the number of graduates remained fairly stable. All schools in the Kendall recruiting area drew fewer students absolutely and in percent. At *Coral Park*, there has been a notable 22 percentage point decline in draw.

Figure 2 charts the comparison between the proportion of high school graduates (darker shaded) and the proportion of draw (light shaded) from within the Kendall area. Schools are arranged from left to right by the number of graduates. The graduates in the unknown category may be attending postsecondary schools elsewhere, employed, or not found.

WOLFSON CAMPUS

Tables 7 and 8 present data on the **Wolfson Campus** recruiting schools for the past five years. Table 7 gives summary data and an ethnic distribution.

- For 1996-97 there were 3,102 high schools graduates and M-DCC drew 1,236 or nearly 40% of them.
- Twenty-five percent of *White non-Hispanic* graduates in the Wolfson recruiting area enrolled at Miami-Dade, compared to 31% of *Black non-Hispanics* and 46% of *Hispanics*.
- Across five years, the number of high school graduates increased slightly (3%) while the drop in draw was a substantial -17%.

Table 8 shows the six individual Wolfson recruiting schools. This table is sorted by percent draw high to low. The percent draw is derived by dividing total draw by number of graduates. Those in the Wolfson recruiting region attending another M-DCC campus are grouped under "enrolled other."

- The draw fro *Miami Senior* was 48%, the highest among schools in this recruiting area.
- The draw from three schools was almost equal in percentages - *Miami Beach*, *Miami Springs*, and *Coral Gables* (41%, 40.5%, and 39% respectively). Note that approximately two and one-half times as many graduates from *Miami Springs* are in the "enrolled other" category than are on Wolfson Campus. This type of attendance variation is also evident at *Coral Gables* where nearly 47% of graduates are attending another campus.
- *Jackson* contributed 33% of its graduates to the Wolfson draw, the lowest among Wolfson Campus recruiting schools.

Figure 3 charts the draw of graduates from Wolfson recruiting schools. Bars are ordered left to right by size of graduating class. The lighter shaded portion represents the proportional draw and the darker shaded part represents graduates whose status is unknown. Those in the unknown category may be attending other institutions, may have chosen employment in or out of the state, or may have chosen not to continue their education for the time being.

HOMESTEAD CAMPUS

Tables 9 and 10 give statistics for the **Homestead Campus**. Table 9 shows summary data and the ethnic distribution of graduates.

- In all, the Homestead recruiting area produced 569 graduates in 1996-97. Of these, 37% enrolled at M-DCC.
- Nearly 39% of *White non-Hispanics* and *Hispanic* graduates chose M-DCC. The draw from *Black non-Hispanics* was 33%.
- Compared to 1992-93, graduates decreased 16% and the College's draw decreased a lesser 7%.
- Across five years, the absolute number of *White non-Hispanics* drawn is nearly identical in spite of the appearance of a 12.6 percentage point increase in draw. The draw of *Black non-Hispanics* grew minimally by seven students across five years, while that of *Hispanics* dropped by 21 students. A word of caution: When numbers involved are small, percent changes are disproportionately magnified.

Table 10 displays the two high schools in the Homestead recruiting area. Those attending a campus other than Homestead are classified under "enrolled other."

- There was a draw of 41% from the graduates of *South Dade* high school. Percent drawn year by year for this high school has been variable. The numbers enrolled on Homestead versus "enrolled other' is nearly split down the middle for South Dade graduates.
- Of the 310 *Homestead* high school graduates, 34% were drawn in 1996-97. Here too, a considerable number of students are enrolled on another M-DCC campus.
